**Optimal
Care Plans**

**Your pet's way to a
lifetime of good health.**

Optimal Care Plans provide the ideal level of care for every stage of a pet's life.

Our practice believes that preventive care improves the quality of your pet's life and can add years to it as well. The Optimal Care Plans we have developed will simplify caring for your pet and make it more affordable.

Each Life Stage Plan includes:

1. Unlimited complimentary office visits and physical examinations
2. Comprehensive examinations and age specific health evaluations
3. Individualized vaccination plans based on your pet's unique needs
4. Early screening for serious health risks
5. A 5% discount off of the fees for services included in the plans.

Our Goal:

To provide your best friend with affordable preventive health care.

Our Optimal Care Plans are better than having insurance.

Compared with insurance, where you pay for coverage that you may never use, our Optimal Care Plans always provide all of the services you pay for.

Our plans are geared to the prevention of diseases and the early detection of serious illnesses, many of which become more common as your pet ages. A big advantage of our plans is that they provide your pet with the ideal care that you want and divide the cost of that care into twelve very affordable monthly payments.
